MCA and DoLS [Download PDF](#)

Course Aim

To apply the Mental Capacity Act Principles into the care you provide to those with a mental health condition or living with dementia.

Learning Outcomes

- Be up to date with current statistics surrounding mental capacity
- Know what the MCA is, why it's important and who it affects
- Know how to identify someone with a lack of capacity
- Be aware of the key legislations surrounding mental capacity
- Know the boundaries involved when caring for someone with a lack of capacity
- Recognise how to help individuals make informed choices
- How to risk assess a person's choices
- Recognise what "best interests" are and how to use the checklist provided
- Know the 5 core principles of MCA
- Know how and when to assess capacity
- Be aware of the two-stage functional test for capacity
- Be familiar with the standard authorisation process
- Understand how to restrict and restrain in a person's best interest
- Know how to write Care Plans for individuals that lack capacity

MCA and DoLS

This course is aimed at people caring for individuals who lack the capacity to make decisions.
